Make your organization cleaner, greener, safer, and more competitive.

Successful companies use the Plan–Do–Check–Act (PDCA) management system for the control and continuous improvement of processes and products, including environmental (ISO 14000), safety (OHSAS 18000), and most recently energy (ISO 50000 and Superior Energy Performance).

Ways PennTAP can help:

Whether you are just getting started with your management system or would like external assistance to manage and/or improve your existing system, PennTAP can help. PennTAP services include:

- gap analyses
- implementation support
- internal auditing
- management and employee training
- internal auditor training

Why PennTap?

PennTAP professionals have more than twenty years of experience in environmental, health, and safety (EHS) and energy efficiency work in manufacturing, and experience in implementation and support services for management systems. Our staff includes two Certified Practitioners in Energy Management Systems (Superior Energy Performance), and trained auditors.
